

**A2N** IT MATTERS.  
SECURE IT.

## JOB POSTING: IT Security Assessor

- Vulnerability Assessments
- Web Application & Penetration Testing
- Strong Report & Presentation Skills

A2N is seeking an IT Security Assessor to be a part of our Assessment Services Team. The candidate will be responsible for a variety of information security assessment engagements, including: web application assessments, penetration testing, vulnerability assessment, wireless assessments, network/security assessments and threat/risk assessments. The candidate must have strong written, verbal communication and presentation skills and be comfortable working with customers, management, technical staff, and external vendors.

### Reporting Relationship:

- This position reports to the President

### Qualifications:

- Minimum 4 years in the IT security arena with a demonstrated track record.
- The ability to think laterally and solve problems in unique ways.
- Strong knowledge of attacker tools, exploit techniques and assessment procedures.
- Strong understanding of networking, operating systems and server technologies.
- Strong desire to research and remain current in the latest exploits and penetration testing strategies.
- Good understanding of security compliance and testing frameworks (e.g. PCI, NIST, OWASP)
- Good understanding of common business applications (e.g. content management systems, application servers, databases, etc.) and how to leverage them in an assessment.
- Ability to relate work to the business, understanding the impact to business processes, not just technical impact.
- Ability to remain calm and methodical under pressure.
- Ability to work as part of a dynamic team while demonstrating flexibility, autonomy, and initiative.
- Outstanding written, verbal and presentation skills; strong English language skills are a plus.
- Industry certifications preferred: CISSP, CISA, CISM, CGEIT, CRISC, CCSK, PCI.
- Personal vehicle required.
- Local Ontario Police clearance mandatory

### Primary Responsibilities

- Conduct vulnerability assessments & penetration testing against 3<sup>rd</sup> party environments.
- Create logical & methodical assessment reports with strong recommendation and mitigation strategies.
- Present report and assessment findings to customers.
- Conduct PCI-ASV scanning.
- Assist in customer vulnerability and gap mitigation strategies.
- Adhere to strict industry principles and values
- Stay current and utilize industry standards and best practices to drive improvements in overall Third Party security posture
- Cross-train technical staff on assessment tactics and methods
